

Feather River Pre-Finished Color Recommendations: Matching Minwax Stain for Wood Components

Note: Before staining or painting any part of Feather River entry system, it is important to follow the Stain/Paint Manufacturer's Application Instructions for product preparation, application, and maintenance. As with any stained product, finished appearance will depend on personal preference, product/material being stained, application, and amount of time allowed for stain penetration or number of coats applied. We highly recommend that testing be performed on backside of jamb prior to staining to ensure that color meets expectations. *Due to the subjectivity of finished appearance, following are ONLY recommendations.*

Tan Primed Components: Since this is a "Primed" Product, stain will not penetrate as it would with a Clear Pine Jamb. Primed Jamb can be stained; however, it will not provide the stain consistency and appearance as a Clear Pine Jamb. Brush application is recommended.

Light Oak Door Finish: Minwax Oil Base Wood Stain=English Chestnut(233)

One coat application recommended

Medium Oak Door Finish: Minwax Oil Base Wood Stain= English Chestnut(233)

Two coat application recommended

Burgundy Oak Door Finish: Minwax Oil Base Wood Stain= Red Mahogany(225)

Two coat application recommended

Chocolate Mahogany Door Finish: Minwax Oil Base Wood Stain=Red Mahogany (225)

Medium to heavy application recommended

Cherry Mahogany Door Finish: Minwax Oil Base Wood Stain= Sedona Red (222)

Medium to heavy application recommended

Clear Pine Components: Offers more consistent stain finish and appearance. Follow stain manufacturer's direction for stain application.

Light Oak Door Finish: Minwax Oil Base Wood Stain=English Chestnut(233)

Light application of stain recommended

Medium Oak Door Finish: Minwax Oil Base Wood Stain= English Chestnut(233)

One coat application of stain recommended

Burgundy Oak Door Finish: Minwax Oil Base Wood Stain= Red Mahogany(225)

One coat application of stain recommended

Chocolate Mahogany Door Finish: Minwax Oil Base Wood Stain=Red Mahogany (225)

Medium to heavy application recommended

Cherry Mahogany Door Finish: Minwax Oil Base Wood Stain= Sedona Red (222)

Medium to heavy application recommended

After stain finish, It is recommended applying a clear protective finish. Follow stain manufacturer's direction regarding which protective finish to use.

Note: Wood Components= Jamb, Brickmold, Astragal, and Mahogany Wood Clad Metal Astragal
